

CASE STUDY

Premium 6000

Sandy White & Peter Greenwood
Bognor Regis
West Sussex

Sandy White and Peter Greenwood installed a Premium 6000 home lift at their South Coast beach front home. Set over three storeys with a panoramic sea view, the couple bought this property as a forever home and so took steps to ensure that it would suit their needs long into the future.

“We decided to install a lift to futureproof our home as part of an extensive modernisation project. With principal rooms on the middle floor to make the most of the view, we wanted to find one that wouldn’t dominate or detract from, but instead add to, our contemporary open plan vision for our main living space,” Sandy commented.

To create the desired aesthetic, a mix of doors was specified, with fire doors on the ground and upper floors and full glass on the all-important middle floor. The Premium 6000 has a large enough footprint to carry a wheelchair, making the home incredibly versatile for guests and future owners.

The couple chose to work with Evo Home Lifts on the basis of competitive price, good advice, friendly service and location. “We prefer to support local businesses wherever possible and were very impressed with how helpful Evo Home Lifts were on the phone when we first made contact. We would thoroughly recommend them. The lift was a difficult purchase decision because we hadn’t seen one in action and I’m pleased to now be able to show others our lift if it helps them make up their own minds.”

To remain fit for as long as possible, Sandy confesses she currently tries not to use the lift too much! “However, it is exceptionally helpful for family members and when we’re carrying suitcases and shopping! In short, it’s done exactly what we needed it to do – it’s there for us when we need it,” she said.
